

Kaeluma Brand Style & Design System Guide

Welcome to the comprehensive branding and design guide for **Kaeluma**. This document serves as the single source of truth for the brand identity, user experience design, color systems, component standards, typography, and marketing assets for Kaeluma.

BRAND STYLE & DESIGN SYSTEM

A Gamified Quest Dashboard for Family Chores

1. Brand Essence & Positioning

Version 1.0 (Official Guide)

Kaeluma (formerly "LifeXP") is a **100% free, ad-free gamified chore application** designed to help children turn everyday household responsibilities into rewarding adventure quests.

graph TD

A[Kaeluma Brand Philosophy] --> B[Child-Centric Engagement]

A --> C[Parental Control & Trust]

A --> D[Community-Supported Integrity]

B --> B1[Cosmic / Gaming Aesthetics]

B --> B2[Micro-Animations & Delighters]

B --> B3[Leveling & Reward Shop]

C --> C1[PIN Protection Systems]

C --> C2[Intuitive Approvals Flow]

D --> D1[100% Free & Ad-Free]

D --> D2[Stripe Donations Model]

Brand Pillars

- **Gamified Adventure:** Life is a quest. Chores are not tasks; they are "Missions" that award gold coins and XP.
- **Premium Quality:** Kaeluma is styled like a premium video game console dashboard. It avoids the cheap "kids-app" cartoonish tropes in favor of deep space colors, glowing controls, and modern typography.
- **Safety & Simplicity:** Built with robust parental boundaries, family-level settings, and strict pin security, ensuring a safe digital space for children.

- **Open & Altruistic:** By remaining 100% free with no ads, trackers, or subscription paywalls, Kaeluma runs on trust and voluntary support.

Voice & Tone

- **Encouraging:** Celebrates child achievements with visual rewards, level-up milestones, and dynamic effects.
- **Sleek & Clean:** Minimal copy, highly visual, clean interface spacing.
- **Friendly but Sophisticated:** Appeals to kids aged 6-14 who crave a more adult-like "gaming hub" rather than a childish cartoon look.

 2. The Color System

Kaeluma's color system is engineered for dark mode, using custom CSS variables (found in [variables.css](#)) that implement a modern glowing theme.

Core Canvas Colors

Used for backgrounds, surface containment, and page-wide styling.

VARIABLE NAME	HEX CODE	VISUAL SWATCH	INTENT & APPLICATION
<code>--bg-deep</code>	<code>#0d0d14</code>		Core canvas background. Deep, cosmic black.
<code>--bg-surface</code>	<code>#171723</code>		Primary container backing. Card backgrounds, navigation panels.
<code>--bg-surface-alt</code>	<code>#222234</code>		Hover states and secondary level surfaces.
<code>--bg-glass</code>	<code>rgba(255, 255, 255, 0.03)</code>		Translucent floating overlays.
<code>--bg-glass-border</code>	<code>rgba(255, 255, 255, 0.08)</code>		Glass component border stroke.

Semantic Accent Colors

These colors provide consistent semantic feedback across the application.

VARIABLE NAME	HEX CODE	VISUAL SWATCH	SEMANTIC MEANING	DIM VARIANT
<code>--gold</code>	<code>#facc15</code>		Coins, rewards, achievements	<code>rgba(250, 204, 21, 0.15)</code>
<code>--amber</code>	<code>#f59e0b</code>		High value coin highlights, premium rewards	<code>rgba(245, 158, 11, 0.15)</code>
<code>--purple</code>	<code>#a855f7</code>		Level-ups, special themes, crests	<code>rgba(168, 85, 247, 0.15)</code>
<code>--cyan</code>	<code>#06b6d4</code>		XP tracks, streak meters, information	<code>rgba(6, 182, 212, 0.15)</code>
<code>--green</code>	<code>#22c55e</code>		Actions, approvals, success states	<code>rgba(34, 197, 94, 0.15)</code>
<code>--red</code>	<code>#ef4444</code>		Danger, deletions, errors, wrong PINs	<code>rgba(239, 68, 68, 0.15)</code>

Glow Effects

To support the neon gaming aesthetic, key elements utilize glowing shadows:

- **Gold Glow** (`--glow-gold`): `0 0 20px rgba(250, 204, 21, 0.25)`
- **Green Glow** (`--glow-green`): `0 0 20px rgba(34, 197, 94, 0.25)`
- **Purple Glow** (`--glow-purple`): `0 0 20px rgba(168, 85, 247, 0.25)`
- **Cyan Glow** (`--glow-cyan`): `0 0 20px rgba(6, 182, 212, 0.25)`

3. Dynamic Tier Theme System

One of Kaeluma's core gamification loops is unlockable interface themes based on child levels. These are declared as specific theme classes in `variables.css` and reassign `--primary`, `--primary-dim`, and `--glow-primary` variables dynamically.

Theme Categorization

TIER / LEVEL RANGE	THEME CLASS	PRIMARY HEX	tone & design direction
Level 1 (Starter)	.theme-seedling .theme-bubblegum .theme-ocean	#4ade80 #f472b6 #38bdf8	Fresh & Playful: High contrast, bright organic neon tones.
Level 3 - 10	.theme-morning-sky .theme-lavender-mist .theme-golden-hour .theme-mint	#7dd3fc #c084fc #fbbf24 #34d399	Pastel Dream: Soft, magical sky gradients and cozy morning glows.
Level 12 - 25	.theme-coral .theme-sunny .theme-forest-deep .theme-sky .theme-violet	#fb7185 #facc15 #059669 #0ea5e9 #8b5cf6	Vivid Realms: Grounded nature tones combined with cosmic deep sky blues.
Level 30 - 45	.theme-crimson .theme-teal .theme-stone .theme-candle-flame	#e11d48 #14b8a6 #94a3b8 #f59e0b	Ember & Stone: Industrial, magma-based fires and metallic dark accents.
Level 50 - 70	.theme-indigo .theme-ruby .theme-emerald .theme-sapphire .theme-amethyst	#6366f1 #be123c #10b981 #1d4ed8 #7e22ce	Precious Gemstones: Deep jewel-like glows representing mastery.
Level 75 - 90 (Neon)	.theme-neon-pink .theme-neon-cyan .theme-electric-blue .theme-plasma	#ff00ff #00ffff #2563eb #39ff14	Cyberpunk Neon: Intense 50% opacity glows for extreme visual energy.

TIER / LEVEL RANGE	THEME CLASS	PRIMARY HEX	tone & design direction
Level 92 - 100 (Epic)	.theme-sunset-split	#f97316	Epic Masterclasses: Multi-color complex gradients and animated high-end auras.
	.theme-midnight-split	#4338ca	
	.theme-galactic	#9d174d	
	.theme-magma	#ea580c	
	.theme-rainbow	#00ffcc	
	.theme-	#fbbf24	
	everlight		

4. Typography & Type-Scale

Typography in Kaeluma uses clean lines and heavy weights to evoke a modern arcade/dashboard appearance.

- **Primary Font Family: Outfit** (via Google Fonts). Falls back to `system-ui, -apple-system, sans-serif` if web fonts are unavailable.
- **Header Weight Hierarchy:**
 - `font-weight: 900` (Black) - Brand names, promotional announcements, and level badges.
 - `font-weight: 800` (ExtraBold) - Main Page Titles.
 - `font-weight: 700` (Bold) - Card headers, modal headlines, stats.
- **Body Text Weights:**
 - `font-weight: 600` (SemiBold) - Button texts, navigation items, form inputs.
 - `font-weight: 400` (Regular) - Meta-text, instructions, subtext.

Text Colors

variable name	hex code	application
--text-bright	#f8fafc	Main readable text, headings, white symbols.
--text-muted	#94a3b8	Subheadings, card body text, secondary details.
--text-dim	#475569	Unfocused inputs, placeholders, locked features.

Layout Type Scale

ELEMENT CLASS / STYLE	FONT WEIGHT	DESKTOP SIZE	MOBILE SIZE	LINE HEIGHT	CASE STYLE
Grand Title / Hero	900	3.5rem	2.5rem	1.1	Uppercase
Page Title (<code>.page-title</code>)	800	2.0rem	1.35rem	1.2	Normal
Modal Title (<code>.modal-title</code>)	700	1.5rem	1.25rem	1.3	Normal
Card Header (<code>.mission-name</code>)	600	1.0rem	0.95rem	1.4	Normal
Button Text (<code>.btn</code>)	600	1.0rem	0.875rem	1.0	Normal
Section Header Title	700	1.0rem	0.9rem	1.0	Uppercase (spaced)
Body / Description	400	0.95rem	0.9rem	1.6	Normal
Badges / Pill Labels	700	0.75rem	0.7rem	1.0	Uppercase

5. Spacing, Radius, & Layout System

Kaeluma uses a strict spacing and radius system to maintain a premium feel. The layout avoids cluttered lines in favor of breathing room.

Spacing Scale

Declared as padding and margin variables in CSS:

- `--space-xs: 4px` — Label gaps, tiny button paddings.
- `--space-sm: 8px` — Grid item gap, element group spacing.
- `--space-md: 16px` — Card inner paddings, list row gaps.
- `--space-lg: 24px` — Main component padding, page header gaps.
- `--space-xl: 32px` — Section separations, modal padding.

- `--space-2xl: 48px` — Empty states, layout margins.

Border Radius System

Rounder corners create a kid-friendly but sleek digital environment.

- `--radius-sm: 12px` — Tiny pickers, small inputs.
- `--radius-md: 18px` — Standard buttons, input elements.
- `--radius-lg: 24px` — Cards, containers, modals.
- `--radius-xl: 32px` — Outermost panel cards, overlays.
- `--radius-full: 9999px` — XP bar tracks, badges, pill buttons.

Responsive Grid Breakpoints

- **Mobile Portrait (< 480px)**: Stack cards vertically, scale padding to `--space-sm`, maximize modal width.
- **Tablet / iPad (< 768px)**: Maximize space via compact inputs (`.input-sm`), utilize 2-column grids for rewards.
- **Desktop (>= 1024px)**: Full 3-column structures, `--space-lg` spacing defaults, full glassmorphic side navigation layouts.

6. UI Component Design Patterns

All CSS components are modularly designed and reside in [components.css](#). Below are the specifications for rebuilding or designing new elements.

Glassmorphic Spec

All container elements (like cards, modals, and input areas) float above the deep background using a glass-like shell.

```
background: var(--bg-surface);
border-radius: var(--radius-lg);
border: 1px solid var(--bg-glass-border);
box-shadow: inset 0 1px 0 rgba(255, 255, 255, 0.05), 0 4px 20px rgba(0, 0, 0, 0.4);
```

Button Specifications

Buttons must be visual focal points with tactile feedback.

1. Tactile Press Animation:

To ensure hitboxes never shrink (which causes micro-delays or missed clicks on touch screens), Kaeluma avoids scale-based shrinking transforms on button click. Instead, it uses a brightness-dimming inset shadow:

```
.btn:active {  
  filter: brightness(0.82) !important;  
  box-shadow: inset 0 2px 6px rgba(0,0,0,0.35) !important;  
  transition: filter 0.05s, box-shadow 0.05s !important;  
}
```

2. Button Variations:

- **Primary Button** (`.btn-primary`): Utilizes the active theme color (`--primary`) and glow shadow (`-glow-primary`).
- **Gold Button** (`.btn-gold`): A custom amber-gold gradient (`linear-gradient(135deg, var(--gold), var(--amber))`) with dark navy text. Reserved for Stripe Donations, critical actions, and level-ups.
- **Ghost Button** (`.btn-ghost`): Glass background with a light border, merging smoothly with the canvas.
- **Success Button** (`.btn-success`): Emerald green, used for approvals and completed tasks.
- **Danger Button** (`.btn-danger`): Red, used for deletions and reset options.

Cards & Badges

- **Hover Interactivity:** Interactive cards scale up slightly (`translateY(-2px)`) and increase border-opacity to feel reactive.
- **Inset Theme Glows:** Cards can highlight coins or magic with thematic borders:
 - `.card-glow-gold` : Golden border glow (`rgba(250, 204, 21, 0.2)`).
 - `.card-glow-purple` : Purple border glow (`rgba(168, 85, 247, 0.2)`).
- **Badges:** Small pill shapes (`--radius-full`) with `0.75rem` uppercase text. They must use the dim variant of their color as the background and the full-saturation accent for the text (e.g. `.badge-gold` uses `--gold-dim` bg and `--gold` text).

7. Motion & Interaction Guidelines

Animations are vital to making Kaeluma feel alive. Motion is smooth, using ease-out cubic beziers.

Transition Timing

- **Fast** (`--duration-fast: 150ms`): Hover states, input focus transitions, press feedback.
- **Normal** (`--duration-normal: 300ms`): Card pop-ins, page navigation slides, tab switching.
- **Slow** (`--duration-slow: 600ms`): Modals opening, overlays.

Micro-Animations

- **Wrong PIN (Shake)**: Shake animation shakes the PIN pad horizontally if validation fails.
- **Coin Shake** (`shake-coin`): Gently wobbles gold coins when hovered or earned.
- **Crest Animations**: Unlockable avatar crests possess unique idle movements:
 - `.crest-sway` : Swaying back-and-forth like a pendulum (`4s` loop).
 - `.crest-pulse` : Pulsing size and opacity (`2s` loop).
 - `.crest-spin-slow` : Slowly spinning backgrounds (`12s` linear loop).
 - `.crest-float` : Hovering floating loop (`3s` loop).
 - `.crest-flicker` : Aura flicker simulating fire (`3s` loop).
- **Level-Up Celebrations**: Shows popping confetti, scaling badges, and a heavy text-shadow pulse (`levelUpGlow`).

8. The Gold Coin System

Kaeluma uses a central gold coin currency. To ensure consistent visual representation, **never use standard emoji symbols** (), because Windows OS displays them as flat silver metal, violating the brand color.

Instead, always import and use the custom `<GoldCoin />` component (`GoldCoin.js`).

GoldCoin Technical Specification

```
// Renders an inline SVG gold coin with premium metallic gold gradients
import React, { useId } from 'react';

export default function GoldCoin({ className = "w-5 h-5 inline-block" }) {
  const gradientId = useId();
  return (
    <svg className={className} viewBox="0 0 24 24" fill="none" xmlns="http://www.w3.org/2000/svg">
      <circle cx="12" cy="12" r="10" fill={`url(#outer-${gradientId})`} stroke={`url(#border-${gradientId})`} />
      <circle cx="12" cy="12" r="7" fill={`url(#inner-${gradientId})`} stroke={`url(#border-${gradientId})`} />
      <path d="M12 7V17M9 10H14C15 10 15 12 12 12.5C9 13 9 15 13 15H15" stroke="#78350F" strokeWidth="1.5" />
      <defs>
        <linearGradient id={`outer-${gradientId}`} x1="0" y1="0" x2="24" y2="24" gradientUnits="userSpaceOnUse">
          <stop stopColor="#FBBF24" />
          <stop offset="0.5" stopColor="#F59E0B" />
          <stop offset="1" stopColor="#D97706" />
        </linearGradient>
        <linearGradient id={`inner-${gradientId}`} x1="4" y1="4" x2="20" y2="20" gradientUnits="userSpaceOnUse">
          <stop stopColor="#FEF08A" />
          <stop offset="0.7" stopColor="#F59E0B" />
          <stop offset="1" stopColor="#B45309" />
        </linearGradient>
        <linearGradient id={`border-${gradientId}`} x1="0" y1="0" x2="24" y2="24" gradientUnits="userSpaceOnUse">
          <stop stopColor="FFFFFF" stopOpacity="0.4" />
          <stop offset="1" stopColor="#78350F" stopOpacity="0.6" />
        </linearGradient>
      </defs>
    </svg>
  );
}
```

9. Email Brand Standards

Email communications are built using React Email guidelines, styled to represent Kaeluma's premium identity in recipient inboxes (source found in [BaseTemplate.jsx](#)).

- **Outer Envelope:** Light grey `#f3f4f6` container holding a card style block to provide high readability.

- **Header Brand Bar:** Solid deep navy `#1E1B4B` with the inline branding text and Sun icon.
- **Primary Call to Actions:** Custom glowing purple `#A855F7` flat-buttons with white bold text.
- **Support Footer:** Value-for-value alert box tinted with a soft Indigo backdrop (`rgba(99, 102, 241, 0.05)`) directing parents to Stripe Checkout.

10. Stripe Donation Interface Customization

Kaeluma uses Stripe for voluntary, community-supported donations (<https://donate.stripe.com/28EfZg6aG810f5zd8ggQE00>). The Stripe customer portal and payment checkout pages must be configured in the Stripe Dashboard with the following branding options to match Kaeluma's look:

- **Brand Color:** `#A855F7` (Glowing Purple)
- **Accent Color:** `#3B82F6` (Vivid Blue)
- **Background Color:** `#1E1B4B` (Deep Navy) or `#0d0d14` (Deep Black)
- **Checkout Logo Icon:** Use [logo_icon.png](#) (Square 512×512 Sun logo on dark backdrop).
- **Billing Header Logo/Banner:** Use [logo_main.png](#) or [banner.png](#) (16:9 Banner).

11. Marketing & Social Asset Directory

The `branding/` folder contains generated PNG graphics for launches, store fronts, and social campaigns.

TIP

Since the project creator has an active Adobe Creative Suite subscription, these PNGs are generated as 300dpi master-ratio images. You can import them directly into **Adobe Photoshop** or **Adobe Illustrator** as base canvas templates, add tailored text elements, overlays, or product feature callouts, and export them as pixel-perfect campaigns.

Social & Promo Media Catalog

ASSET FILENAME	DIMENSIONS	ASPECT RATIO	PRIMARY USE CASE
logo_main.png	Vector-aligned	Variable	Main horizontal branding header. Includes the sun icon with the "Kaeluma" gradient logotype.
logo_icon.png	512×512	1:1	App Icon, favicon, avatar, Stripe checkout, or App Store logo badge.
banner.png	1920×1080	16:9	Launch banner, website hero backgrounds, blog post banners.
social_square_post.png	1080×1080	1:1	Instagram post feed, Facebook update, LinkedIn project preview.
twitter_header.png	1500×500	3:1	Twitter/X Profile header illustration.
facebook_cover.png	820×312	2.63:1	Facebook page banner.
story_missions.png	1080×1920	9:16	Vertical mobile showcase focusing on Child Questing/Missions.
story_rewards.png	1080×1920	9:16	Vertical mobile showcase focusing on the Reward Shop.
app_store_feature.png	1280×720	16:9	Google Play Feature Graphic, App Store preview cover, or Product Hunt card.
og_share_card.png	1200×630	1.91:1	Dynamic Open Graph preview card for Slack, Discord, Facebook messenger.
email_hero.png	600×300	2:1	Newsletter welcome banner.
coin.png	512×512	1:1	Isolated 3D high-fidelity Gold Coin graphic.
video_bg.png	1080×1920	9:16	Video backdrop overlay for TikTok/YouTube Shorts. Import into Premiere Pro or After Effects.

🚫 12. Design Do's & Don'ts

To ensure the Kaeluma brand retains its high-fidelity appearance, follow these simple rules:

DO ✅

- Use the dynamic tier theme variables (`--primary`) for all core action buttons rather than hardcoding static greens or blues.
- Enforce Outfit as the typography family for all titles. Keep titles in heavy weights (`800` / `900`).
- Always use the `<GoldCoin />` component instead of  or other generic coins.
- Maintain the dark mode interface. Never style white backgrounds or solid bright grey panels.
- Make sure parent actions always request PIN confirmation with error fallback states.

DON'T ❌

- Do not overlay text directly on backgrounds without utilizing a glassmorphic container (`.card` or `.btn-ghost`).
- Do not scale down buttons on click; use the brightness overlay to avoid touch misses.
- Do not use hard borders or harsh angles; always apply `--radius-md` or `--radius-lg` .
- Do not add subscription references or commercial paywall branding. The Stripe link is exclusively for **donations** (<https://donate.stripe.com/28EfZg6aG810f5zd8ggQE00>).
- Do not use standard, low-contrast system fonts for landing page highlights.

This branding guide will help developers, designers, and copywriters maintain visual consistency and protect the magical, premium feel of Kaeluma. Let's make chore time an epic adventure!
